

Amendment to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Currently amended) A pharmaceutical composition comprising solid microparticles comprising an agent and a matrix comprising lipid, protein, and sugar; wherein the microparticles are not liposomes; wherein the agent is encapsulated in the matrix; wherein the microparticles are less than 50 micrometers in diameter; wherein the lipid comprises 20-60% of the matrix by weight; wherein the protein comprises 10-30% of the matrix by weight; ~~and~~ wherein the sugar comprises 10-30% of the matrix by weight; and wherein the composition does not comprise a synthetic polymer.
- 2-6. (Canceled)
7. (Original) The pharmaceutical composition of claim 1 wherein the agent is a therapeutic agent.
8. (Original) The pharmaceutical composition of claim 1 wherein the agent is a local anesthetic.
9. (Original) The pharmaceutical composition of claim 1 wherein the agent is selected from the group consisting of procaine, lidocaine, dibucaine, tetracaine, bupivacaine, mepivacaine, and articaine.
10. (Original) The pharmaceutical composition of claim 1 wherein the agent is bupivacaine.
11. (Original) The pharmaceutical composition of claim 1 wherein the agent is an anticonvulsant.
12. (Original) The pharmaceutical composition of claim 1 wherein the agent is a vasodilator.
13. (Original) The pharmaceutical composition of claim 1 wherein the agent is a protein.

14. (Original) The pharmaceutical composition of claim 1 wherein the agent is a lipid.
15. (Original) The pharmaceutical composition of claim 1 wherein the agent is a glycosaminoglycan.
16. (Original) The pharmaceutical composition of claim 1 wherein the agent is a diagnostic agent.
17. (Original) The pharmaceutical composition of claim 1 wherein the agent is a prophylactic agent.
18. (Original) The pharmaceutical composition of claim 1 wherein the lipid is a naturally occurring lipid.
19. (Original) The pharmaceutical composition of claim 1 wherein the lipid is an emulsifier.
20. (Original) The pharmaceutical composition of claim 1 wherein the lipid is a surfactant.
21. (Withdrawn) The pharmaceutical composition of claim 1 wherein the lipid is positively charged.
22. (Withdrawn) The pharmaceutical composition of claim 1 wherein the lipid is negatively charged.
23. (Original) The pharmaceutical composition of claim 1 wherein the lipid has no charge.
24. (Original) The pharmaceutical composition of claim 1 wherein the lipid is a phosphatidylcholine.
25. (Original) The pharmaceutical composition of claim 1 wherein the lipid is dipalmitoylphosphatidylcholine (DPPC).
26. (Withdrawn) The pharmaceutical composition of claim 1 wherein the lipid is polyvinyl alcohol.

27. (Original) The pharmaceutical composition of claim 1 wherein the lipid is a phospholipid.
28. (Previously presented) The pharmaceutical composition of claim 1 wherein the lipid is selected from the group consisting of phosphoglycerides; phosphatidylcholines; dipalmitoyl phosphatidylcholine (DPPC); dioleoylphosphatidyl ethanolamine (DOPE); dioleoyloxypropyltriethylammonium (DOTMA); dioleoylphosphatidylcholine; cholesterol; cholesterol ester; diacylglycerol; diacylglycerolsuccinate; diphosphatidyl glycerol (DPPG); hexanadecanol; fatty alcohols; polyethylene glycol (PEG); polyoxyethylene-9-lauryl ether; a surface active fatty acid; palmitic acid; oleic acid; fatty acids; fatty acid amides; sorbitan trioleate (Span 85) glycocholate; surfactin; a poloxomer; a sorbitan fatty acid ester; sorbitan trioleate; lecithin; lysolecithin; phosphatidylserine; phosphatidylinositol; sphingomyelin; phosphatidylethanolamine (cephalin); cardiolipin; phosphatidic acid; cerebrosides; dicitylphosphate; dipalmitoylphosphatidylglycerol; stearylamine; dodecylamine; hexadecyl-amine; acetyl palmitate; glycerol ricinoleate; hexadecyl stearate; isopropyl myristate; tyloxapol; poly(ethylene glycol)5000-phosphatidylethanolamine; and phospholipids.
29. (Withdrawn) The pharmaceutical composition of claim 1 wherein the lipid is a derivatized lipid.
30. (Original) The pharmaceutical composition of claim 1 wherein the protein is an albumin.
31. (Withdrawn) The pharmaceutical composition of claim 1 wherein the protein is a whole cell extract.
32. (Withdrawn) The pharmaceutical composition of claim 1 wherein the protein is an antibody.
33. (Withdrawn) The pharmaceutical composition of claim 1 wherein the protein is an enzyme.

34. (Withdrawn) The pharmaceutical composition of claim 1 wherein the protein is glucose oxidase.
35. (Withdrawn) The pharmaceutical composition of claim 1 wherein the protein is insulin.
36. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar comprises a mixture of complex and simple sugars.
37. (Original) The pharmaceutical composition of claim 1 wherein the sugar is lactose.
38. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar is cellulose.
39. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar is a chemically modified sugar.
40. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar is a glycosaminoglycan.
41. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar is dextran.
42. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar is a chemically modified dextran.
43. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar is chondroitin sulfate.
44. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar is a derivatized sugar.
45. (Withdrawn) The pharmaceutical composition of claim 1 wherein the sugar is a chemically modified sugar.
46. (Previously presented) The pharmaceutical composition of claim 1 wherein the sugar is selected from the group consisting of galactose, lactose, glucose, maltose, starches, cellulose and its derivatives, methyl cellulose, carboxymethyl cellulose, fructose, dextran

and its derivatives, raffinose, mannitol, xylose, dextrans, glycosaminoglycans, sialic acid, chitosan, hyaluronic acid, and chondroitin sulfate.

47. (Original) The pharmaceutical composition of claim 1 wherein the ratio of lipid to protein to sugar is approximately 3:1:1.
- 48-57. (Canceled)
58. (Original) The pharmaceutical composition of claim 1 wherein the microparticles are less than 10 micrometers in diameter.
59. (Original) The pharmaceutical composition of claim 1 wherein the microparticles are less than 5 micrometers in diameter.
60. (Original) The pharmaceutical composition of claim 1 wherein the microparticles are less than 1 micrometer in diameter.
61. (Original) The pharmaceutical composition of claim 1 wherein the microparticles are less than 500 nanometers in diameter.
62. (Currently amended) A method of preparing solid microparticles comprising an agent encapsulated in a lipid-protein-sugar matrix, the method comprising steps of:
 providing an agent;
 contacting the agent with a lipid, a protein, and a sugar; and
 spray drying mixture of the agent, the lipid, the protein, and the sugar to make solid microparticles, wherein the microparticles are not liposomes; wherein the agent is encapsulated in the matrix; wherein the microparticles are less than 50 micrometers in diameter; wherein the lipid comprises 20-60% of the matrix by weight; wherein the protein comprises 10-30% of the matrix by weight; ~~and~~ wherein the sugar comprises 10-30% of the matrix by weight; and wherein the microparticles do not comprise a synthetic polymer.

63. (Currently amended) A method of administering an agent, the method comprising steps of:
- providing a patient;
 - providing solid microparticles of an agent encapsulated in a lipid-protein-sugar matrix, wherein the microparticles are not liposomes; and
 - administering the microparticles to the patient;
- wherein the microparticles are not liposomes; wherein the agent is encapsulated in the matrix; wherein the microparticles are less than 50 micrometers in diameter; wherein the lipid comprises 20-60% of the matrix by weight; wherein the protein comprises 10-30% of the matrix by weight; ~~and~~ wherein the sugar comprises 10-30% of the matrix by weight; and wherein the microparticles do not comprise a synthetic polymer.
64. (Original) The method of claim 63 wherein the step of administering comprises injecting the microparticles into the patient.
65. (Original) The method of claim 63 wherein the step of administering comprises placing the microparticles in a body cavity of the patient.
- 66-79. (Canceled)
80. (Previously presented) The pharmaceutical composition of claim 1 wherein the microparticles range from 3 microns to 5 microns in diameter.
- 81-83. (Canceled)
84. (Previously presented) The pharmaceutical composition of claim 1, ~~2, or 6~~, wherein the microparticles are prepared by spray drying.
85. (Currently amended) A solid microparticle comprising an agent and a matrix comprising lipid, protein, and sugar, wherein the agent is encapsulated in the matrix; wherein the microparticle is prepared by spray drying; wherein the microparticles are not liposomes; wherein the agent is encapsulated in the matrix; wherein the microparticles are less than 50 micrometers in diameter; wherein the lipid comprises 20-60% of the matrix by

weight; wherein the protein comprises 10-30% of the matrix by weight; ~~and~~ wherein the sugar comprises 10-30% of the matrix by weight; and wherein the microparticle does not comprise a synthetic polymer.

86. (Currently amended) A pharmaceutical composition comprising solid microparticles, wherein the microparticles are not liposomes, comprising:

(a) a matrix comprising:

a lipid selected from the group consisting of phosphoglycerides; phosphatidylcholines; dipalmitoyl phosphatidylcholine (DPPC); dioleoylphosphatidyl ethanolamine (DOPE); dioleoyloxypropyltriethylammonium (DOTMA); dioleoylphosphatidylcholine; cholesterol; cholesterol ester; diacylglycerol; diacylglycerolsuccinate; diphosphatidyl glycerol (DPPG); hexanedeccanol; fatty alcohols; polyethylene glycol (PEG); polyoxyethylene-9-lauryl ether; a surface active fatty acid; palmitic acid; oleic acid; fatty acids; fatty acid amides; sorbitan trioleate (Span 85) glycocholate; surfactin; a poloxomer; a sorbitan fatty acid ester; sorbitan trioleate; lecithin; lysolecithin; phosphatidylserine; phosphatidylinositol; sphingomyelin; phosphatidylethanolamine (cephalin); cardiolipin; phosphatidic acid; cerebrosides; dicetylphosphate; dipalmitoylphosphatidylglycerol; stearylamine; dodecylamine; hexadecyl-amine; acetyl palmitate; glycerol ricinoleate; hexadecyl stearate; isopropyl myristate; tyloxapol; poly(ethylene glycol)5000-phosphatidylethanolamine; and phospholipids;

(i) a sugar selected from the group consisting of galactose, lactose, glucose, maltose, starches, cellulose and its derivatives, methyl cellulose, carboxymethyl cellulose, fructose, dextran and its derivatives, raffinose, mannitol, xylose, dextrans, glycosaminoglycans, sialic acid, chitosan, hyaluronic acid, and chondroitin sulfate; and

(ii) a protein; and

(b) an agent, wherein the agent is encapsulated in the matrix; wherein the microparticles are not liposomes; wherein the agent is encapsulated in the matrix; wherein the microparticles are less than 50 micrometers in diameter; wherein the lipid comprises 20-60% of the matrix by weight; wherein the protein comprises 10-30%

of the matrix by weight; ~~and~~ wherein the sugar comprises 10-30% of the matrix by weight; and wherein the composition does not comprise a synthetic polymer.

87. (Previously presented) The pharmaceutical composition of claim 86, wherein the lipid is dipalmitoyl phosphatidylcholine (DPPC).
88. (Previously presented) The pharmaceutical composition of claim 86, wherein the protein is albumin.
89. (Previously presented) The pharmaceutical composition of claim 86, wherein the sugar is lactose.
90. (Currently amended) A pharmaceutical composition comprising solid microparticles, wherein the microparticles are not liposomes, comprising:
- (a) a matrix comprising:
 - (i) dipalmitoyl phosphatidylcholine (DPPC);
 - (ii) lactose; and
 - (iii) albumin; and
 - (b) an agent, wherein the agent is encapsulated in the matrix;
- wherein the microparticles are not liposomes; wherein the agent is encapsulated in the matrix; wherein the microparticles are less than 50 micrometers in diameter; wherein the lipid comprises 20-60% of the matrix by weight; wherein the protein comprises 10-30% of the matrix by weight; ~~and~~ wherein the sugar comprises 10-30% of the matrix by weight; and wherein the composition does not comprise a synthetic polymer.
91. (Previously presented) The pharmaceutical compositions of any one of claims 1, 86, and 90, wherein the ratio of lipid to protein to sugar is approximately 3:1:1.
- 92-95. (Canceled)
96. (Previously presented) The pharmaceutical compositions of any one of claims 1, 86, and 90, wherein the agent is a small molecule.

97. (Previously presented) The pharmaceutical compositions of any one of claims 1, 86, and 90, wherein the agent is a protein.
98. (Previously presented) The pharmaceutical compositions of any one of claims 1, 86, and 90, wherein the agent is a polynucleotide.
